PRODUCT AND PROCESS RANGE

Product	Documented range	Typical materials / processes	Packing / commercial note
Jigsaw and art puzzles	Existing formats from 24 to 1000 pieces; rectangular, square, floor and round formats.	Printed paper mounted to board; die-cutting; optional surface finish; component counting.	Regular jigsaw projects typically start at 300 sets. Tooling status is reconfirmed.
3D paper puzzles	Vehicles, architecture, animals and display scenes; project-specific assembled size and component count.	Structural review, print, die-cut, scoring, slot/tab fit test and assembly instructions.	MOQ, sample route and production timing follow engineering review.
Board games	Folding boards, paper tokens, tiles, score pads, instructions, inserts and boxes.	Controlled BOM, component version register, print, conversion, collation and assembly.	Buyer-supplied or sourced accessories are identified separately.
Game and playing cards	Project-specific card size, deck count, corner profile, face/back sequence and pack.	Prepress version control, print, cutting, surface finish, collation and deck packing.	Quantity and schedule depend on deck and packaging configuration.
Printed gift packaging	Colour and gift boxes, folding cartons, paper bags, tags and instruction leaflets.	Paper/board selection, structure, print, finishing, die-cutting, folding, gluing and inserts.	Quote with product dimensions, contents, quantity and destination.

IN-HOUSE WORKFLOW AND PROJECT CONTROLS

Workflow	Buyer decision / evidence
Product and file review	Finished size, component count, quantity, destination, target date, artwork/dieline revision and rights to manufacture.
Prepress and approval	Controlling artwork, dieline, BOM, colour reference, proof or sample and approval authority.
Printing and conversion	Material, print target, finish, cutting/scoring, tolerances, in-process checks and allowed substitutions.
Assembly and packing	Component count, instructions, insert, barcode, unit pack, master carton, marks and shipping handoff.
Quality and compliance	Inspection plan, defect classes, sampling/AQL if required, test scope, current applicable documents and record retention.
Trade / contract manufacturing	Full or partial scope, NDA, customer isolation, non-circumvention, tooling/IP ownership, outside processes and neutral delivery.

Document scope and certificate validity are matched to the actual legal entity, product, material, site, destination market and order before reliance. Price, capacity and schedule are issued only against a reviewed specification.
